

# Yash Gupta

Pune, Maharashtra, India

☎ +91-9462233270 ✉ [yashjnvk@gmail.com](mailto:yashjnvk@gmail.com)  [linkedin.com](https://www.linkedin.com)

## SKILLS

---

**Language:** Python, SQL

**Data Analysis and Libraries:** NumPy, Pandas, Matplotlib, Seaborn

**Machine Learning:** Scikit-learn (Regression, Classification, Clustering, PCA)

**Databases:** MySQL, PostgreSQL

**Cloud:** Microsoft Azure, AWS, Google Cloud

**Version Control:** Git

## EXPERIENCE

---

### IBM

January 2025 – Present

*Associate System Engineer*

Pune, India

- Working on BCBSMA health insurance project under Real Time Membership System area
- Analyzing and coding python scripts, perform testing and debugging.
- Performed data analysis and exploratory analysis (EDA) to identify inconsistencies and patterns in datasets.
- Conducted data quality checks and debugging, improving accuracy and consistency of business data.
- Supported reporting and analytics use cases by preparing clean datasets for downstream consumption.

### Tech Mahindra

March 2024 – December 2024

*Associate Software Engineer*

Pune, India

- Undergo foundation training which includes learning programming fundamentals and behavioral training
- Work on Azure Synapse studio and Power BI for data transformation and visualization
- Learn Azure Databricks concepts and ETL process

### Larsen and Turbo Technology Services

Sept 2023 – December 2023

*Intern*

Chennai, India

- Undergo training for period of 3 months to learn programming fundamentals and behavioral learning through online modules
- Works on Music player application which is based on linked list and java file handling concepts

## EDUCATION

---

### BHARATI VIDYAPEETH UNIVERSITY PUNE

July 2019 – July 2023

*B.tech in Computer Engineering - CGPA - 8.86*

## PROJECTS

---

### Sales Analysis

Tech Stack : Python, Data wrangling, Data analysis, Data visualization

- Analyze the sales data of the company for, examining it on a state-by-state basis. Provide insights to assist the company in making data-driven decisions for the upcoming year.

### Creating Cohorts of Songs

Tech Stack : Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PCA, K-Means Clustering

- Performed exploratory data analysis (EDA) and data cleaning on Spotify API dataset to analyze audio features and popularity trends of songs.
- Applied feature engineering, correlation analysis, and visualization to identify patterns and recommend albums based on popularity metrics.
- Implemented K-Means clustering and dimensionality reduction (PCA) to create cohorts of similar songs for improved recommendation insights.

## CERTIFICATIONS

---

- DeepLearning.AI: Generative AI for Everyone
- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Microsoft Certified: Azure Fundamentals(AZ-900)
- Google Cloud: Cloud Digital Leader
- AWS Certified: Cloud Practitioner
