

Yash Gupta

Pune, Maharashtra, India | +91-9462233270 | yashjnvk@gmail.com | [LinkedIn](#)

SKILLS

Languages: Python, SQL

GenAI & LLM: LangChain, LangGraph, OpenAI API, Hugging Face Transformers, Prompt Engineering, RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), Fine-Tuning

Vector Databases: FAISS, ChromaDB

ML & Data: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, PCA, K-Means Clustering

Cloud & Tools: AWS (Bedrock), Google Cloud, Git, Streamlit, FastAPI

Databases: MySQL

EXPERIENCE

IBM | Associate System Engineer

January 2025 – Present

Pune, India

- Developed and maintained Python scripts for data ingestion, transformation, and automation within the Real-Time Membership System for BCBSMA health insurance project.
- Designed and integrated LLM-assisted data validation pipelines using OpenAI API, reducing manual review effort by ~30% on recurring data quality checks.
- Built SQL-based analytical queries and Python ETL workflows to support downstream reporting and analytics consumption for business stakeholders.
- Performed Exploratory Data Analysis (EDA) on large healthcare datasets to surface inconsistencies; documented findings used to improve data governance processes.
- Experimented with prompt engineering techniques to auto-generate structured summaries of anomaly reports, cutting documentation time by ~40%.

Tech Mahindra | Associate Software Engineer

March 2024 – December 2024

Pune, India

- Designed and deployed end-to-end ETL pipelines using Azure Synapse Studio and Azure Databricks, processing structured and semi-structured data for analytics use cases.
- Built interactive Power BI dashboards by integrating cleaned datasets, enabling data-driven decisions for internal business teams.
- Wrote Python scripts for data wrangling and preprocessing, improving pipeline reliability and reducing data errors by 25%.

Larsen & Toubro Technology Services | Intern

September 2023 – December 2023

Chennai, India

- Developed a Music Player application in Java leveraging Linked List data structures and file handling, demonstrating strong programming fundamentals.

PROJECTS

PDF Chatbot — RAG-based Document QA System

Tech Stack: Python, LangChain, OpenAI API, FAISS, Streamlit

- Built an end-to-end Retrieval-Augmented Generation (RAG) pipeline that allows users to upload any PDF and ask natural language questions, returning accurate, context-grounded answers.
- Implemented document chunking, OpenAI text-embedding-ada-002 embeddings stored in FAISS vector store, and a conversational chain using LangChain for multi-turn dialogue.
- Deployed an interactive Streamlit UI achieving sub-3-second response latency on documents up to 200 pages.

YouTube Video Summarizer

Tech Stack: Python, OpenAI API, LangChain, YouTube Transcript API, Streamlit

- Developed an AI-powered tool that fetches YouTube video transcripts via YouTube Transcript API and generates concise, structured summaries using GPT-3.5-turbo with prompt chaining.
- Implemented map-reduce summarization strategy via LangChain to handle long transcripts exceeding the model's context window, reducing token cost by ~45%.
- Packaged as a Streamlit web app enabling users to paste any YouTube URL and receive timestamped key takeaways within seconds.

EDUCATION

Bharati Vidyapeeth University Pune | B.Tech in Computer Engineering

July 2019 – July 2023

CGPA: 8.86

CERTIFICATIONS

- Professional Certificate Course in Generative AI and Machine Learning — IIT Kanpur
- PCEP — Certified Entry-Level Python Programmer (Python Institute)
- Google Cloud: Cloud Digital Leader
- AWS Certified Cloud Practitioner
- Generative AI for Everyone (DeepLearning.AI)
